

LOCAL KNOWLEDGE, GLOBAL STANDARDS

2026 Capability Statement

CORICA

Our philosophy is to do more for Africans than anyone else in the mining sector. This is why, at the start of each project, we recruit workers from the region. We train them on our policies and standards, and ensure that our experienced staff support them to create a strong career plan.

This strategy allows us not only to contribute to the development of the local economy but above all to be in perfect harmony with the community and other stakeholders in our actions.

It is in the same vein that we are actively present in supporting local initiatives, namely: the construction of boreholes, roads, hospitals, schools, urban maintenance, community events and others.

Where we work	22
Our difference	24

The Corica way of contract mining is about more than machines. It's about bringing people together. Nothing is impossible when people come together to deliver.

HELLO, WE'RE CORICA

A FULL-SERVICE MINING SERVICES COMPANY

WE ARE THE AFRICAN-OWNED MINING SERVICES COMPANY WITH GLOBAL STANDARDS

Our story began in 2002 when we moved our first tonne of African soil. Back then, our fleet consisted of a single excavator and truck. Within seven years we had won our first major open pit mining contract, and from that point onwards, there has been no turning back. Today, our workforce is made up of more than 3,500 people across seven African countries. Our extensive portfolio includes major contracts with international resource companies, driving our rapid growth and contributing to a better future for Africans.

CORICA AT A GLANCE

Moved our first tonne of African soil in 2002

One of Africa's largest family-owned mining services companies

Over 3,500 people working across seven countries

Serving the full mine lifecycle, throughout development and into production

Supporting open pit mining, underground mining, civil construction and infrastructure projects

Solving the problems that others can't by bringing people together

Building bonds with the communities in which we operate

Driven to do more for Africans than anyone else in mining

3,500+

WHAT WE BELIEVE

Our Ideology defines who we are and who we want to be as an organisation. It guides everything we do.

What we believe

Africans should have hope for a better future

What we do

We're the African-owned mining services company with global standards

Why we matter

We solve problems others can't

Where we want to be

Do more for Africans than anyone else in mining

How we get there

Don't take short cuts

So we all go home to our families each day, we stick to our training and our processes – always.

Look out for each other

We are bigger than a company – we're part of an African community where everyone matters.

Do what's right, not what's easy

We do what we say we'll do and have the courage not to make excuses, or blame others, when things go wrong.

Make today count

This is our time. We will achieve our goals by making the most of now.

Have fun

We all work hard but we enjoy what we do, and the people we do it with.

BRINGING PEOPLE TOGETHER IS OUR STRENGTH

We solve the problems that others can't.

How we do this is by bringing people together to find a way forward that provides a better future for everyone. We believe that nothing is impossible when we come together to work on the solution.

Anyone can bring machines, however, to truly overcome the challenges of mining successfully in Africa, people are the key.

How we bring people together

We believe that Africans should have hope for a better future, and our ambition is to do more for Africans than anyone else in mining. This is what connects us with the many and diverse communities in which we operate.

The bonds we build between our clients, our people, and our communities, enable us to bring everyone together and take on both the operational and social licensing risks of our projects.

We're with you for the long haul

From the moment you start exploration through to the moment the last tonne of ore is removed from the ground and the land is returned to its natural state, we're with you.

How we work with you

First, we understand what you want to achieve with your resource, then we bring our people, expertise, equipment, standards and the community together to help you extract the most value from it.

WE BELIEVE THAT NOTHING IS IMPOSSIBLE WHEN WE COME TOGETHER TO WORK ON THE SOLUTION

How we work with you

Our process is straightforward. We establish what you want to achieve with your resource, then we bring our people, expertise, equipment, standards, and the community together to help extract the most value.

Our services

We are leaders in the mining industry, committed to delivering high-quality, efficient, and sustainable mining solutions. With years of experience and a team of dedicated professionals, we provide comprehensive mining services tailored to meet the unique needs of our clients.

THE CORICA WAY TO MINE

We're with you for the long haul, from the moment you start exploration through to when the last tonne of ore is removed from the ground and the land is returned to its natural state.

CORICA ENCOMPASSES THREE DIVISIONS

CORICA
MINING SERVICES

Extensive open pit mining solutions, including exploration, grade control and production drilling, production blasting, load and haul, and plant ore feed services ensuring operational excellence and sustainable resource management.

CORICA
UNDERGROUND

Delivering comprehensive underground mining solutions globally, providing specialised machinery and a skilled hybrid workforce of local and expatriate staff to ensure safe and efficient operations tailored to specific project needs.

SFTP
CIVILS

The civil engineering and construction division provides a wide range of services, including bulk earthworks, site preparation, road construction and maintenance, bridge construction and maintenance, major concrete works, rail construction, dams, pipelines, and the supply of quarry materials, catering to the oil and gas, government infrastructure, and building and manufacturing sectors.

CORICA
MINING SERVICES

Production Drilling and Blasting

Operating a fleet of advanced blast hole drill rigs, our team of skilled professionals delivers comprehensive production drilling and blasting services. We focus on achieving optimal fragmentation and cost-efficiency, all while maintaining the highest safety standards.

Exploration and Grade Control Drilling

Maximising resource recovery begins with precise exploration and grade control. Using modern Reverse Circulation drill rigs and following industry-best practices, our team ensures accurate and reliable data, essential for informed decision-making in open-pit operations.

LOCAL KNOWLEDGE, GLOBAL STANDARDS

EXTENSIVE OPEN PIT SOLUTIONS

We deliver skilled personnel, foster strong local partnerships, and deploy an extensive fleet – all while adhering to international standards. Our approach ensures successful and sustainable mining operations across Africa.

Load and haul

Meeting the demands of large-scale open-pit mining, our load and haul services leverage a fleet of 50t to 200t class excavators and 30t to 100t trucks. Experienced operators ensure efficient material handling, which reduces cycle times and boosts productivity.

Long distance haulage

We can support your remote operation with long-distance road haulage using a modern fleet of road trucks ranging from 30t to 50t.

Crusher Feeding

Ensuring smooth and efficient operation of your processing plant, our crusher feeding services manage the continuous and consistent feeding of ore to crushers. We optimise throughput and minimise downtime, adhering to stringent safety and environmental protocols.

Labour and Equipment Hire

We manage a large workforce and modern fleet of well-maintained earthmoving equipment, and can provide these to partners for long- and short-term hire periods. Whether you are looking for a complete workforce or fleet of machines, or something more bespoke, we are here to help you meet your operational needs.

Technical Support and Services

Navigating the complexities of mining operations requires more than just technical know-how – it demands a partner committed to your success. Our technical support and services extend beyond traditional consulting. We offer a partnership that includes detailed project assessments, tailored solutions, and on-the-ground technical expertise. By aligning our support with your specific goals, we help you overcome challenges and ensure your operations are both efficient and sustainable.

CORICA
UNDERGROUND

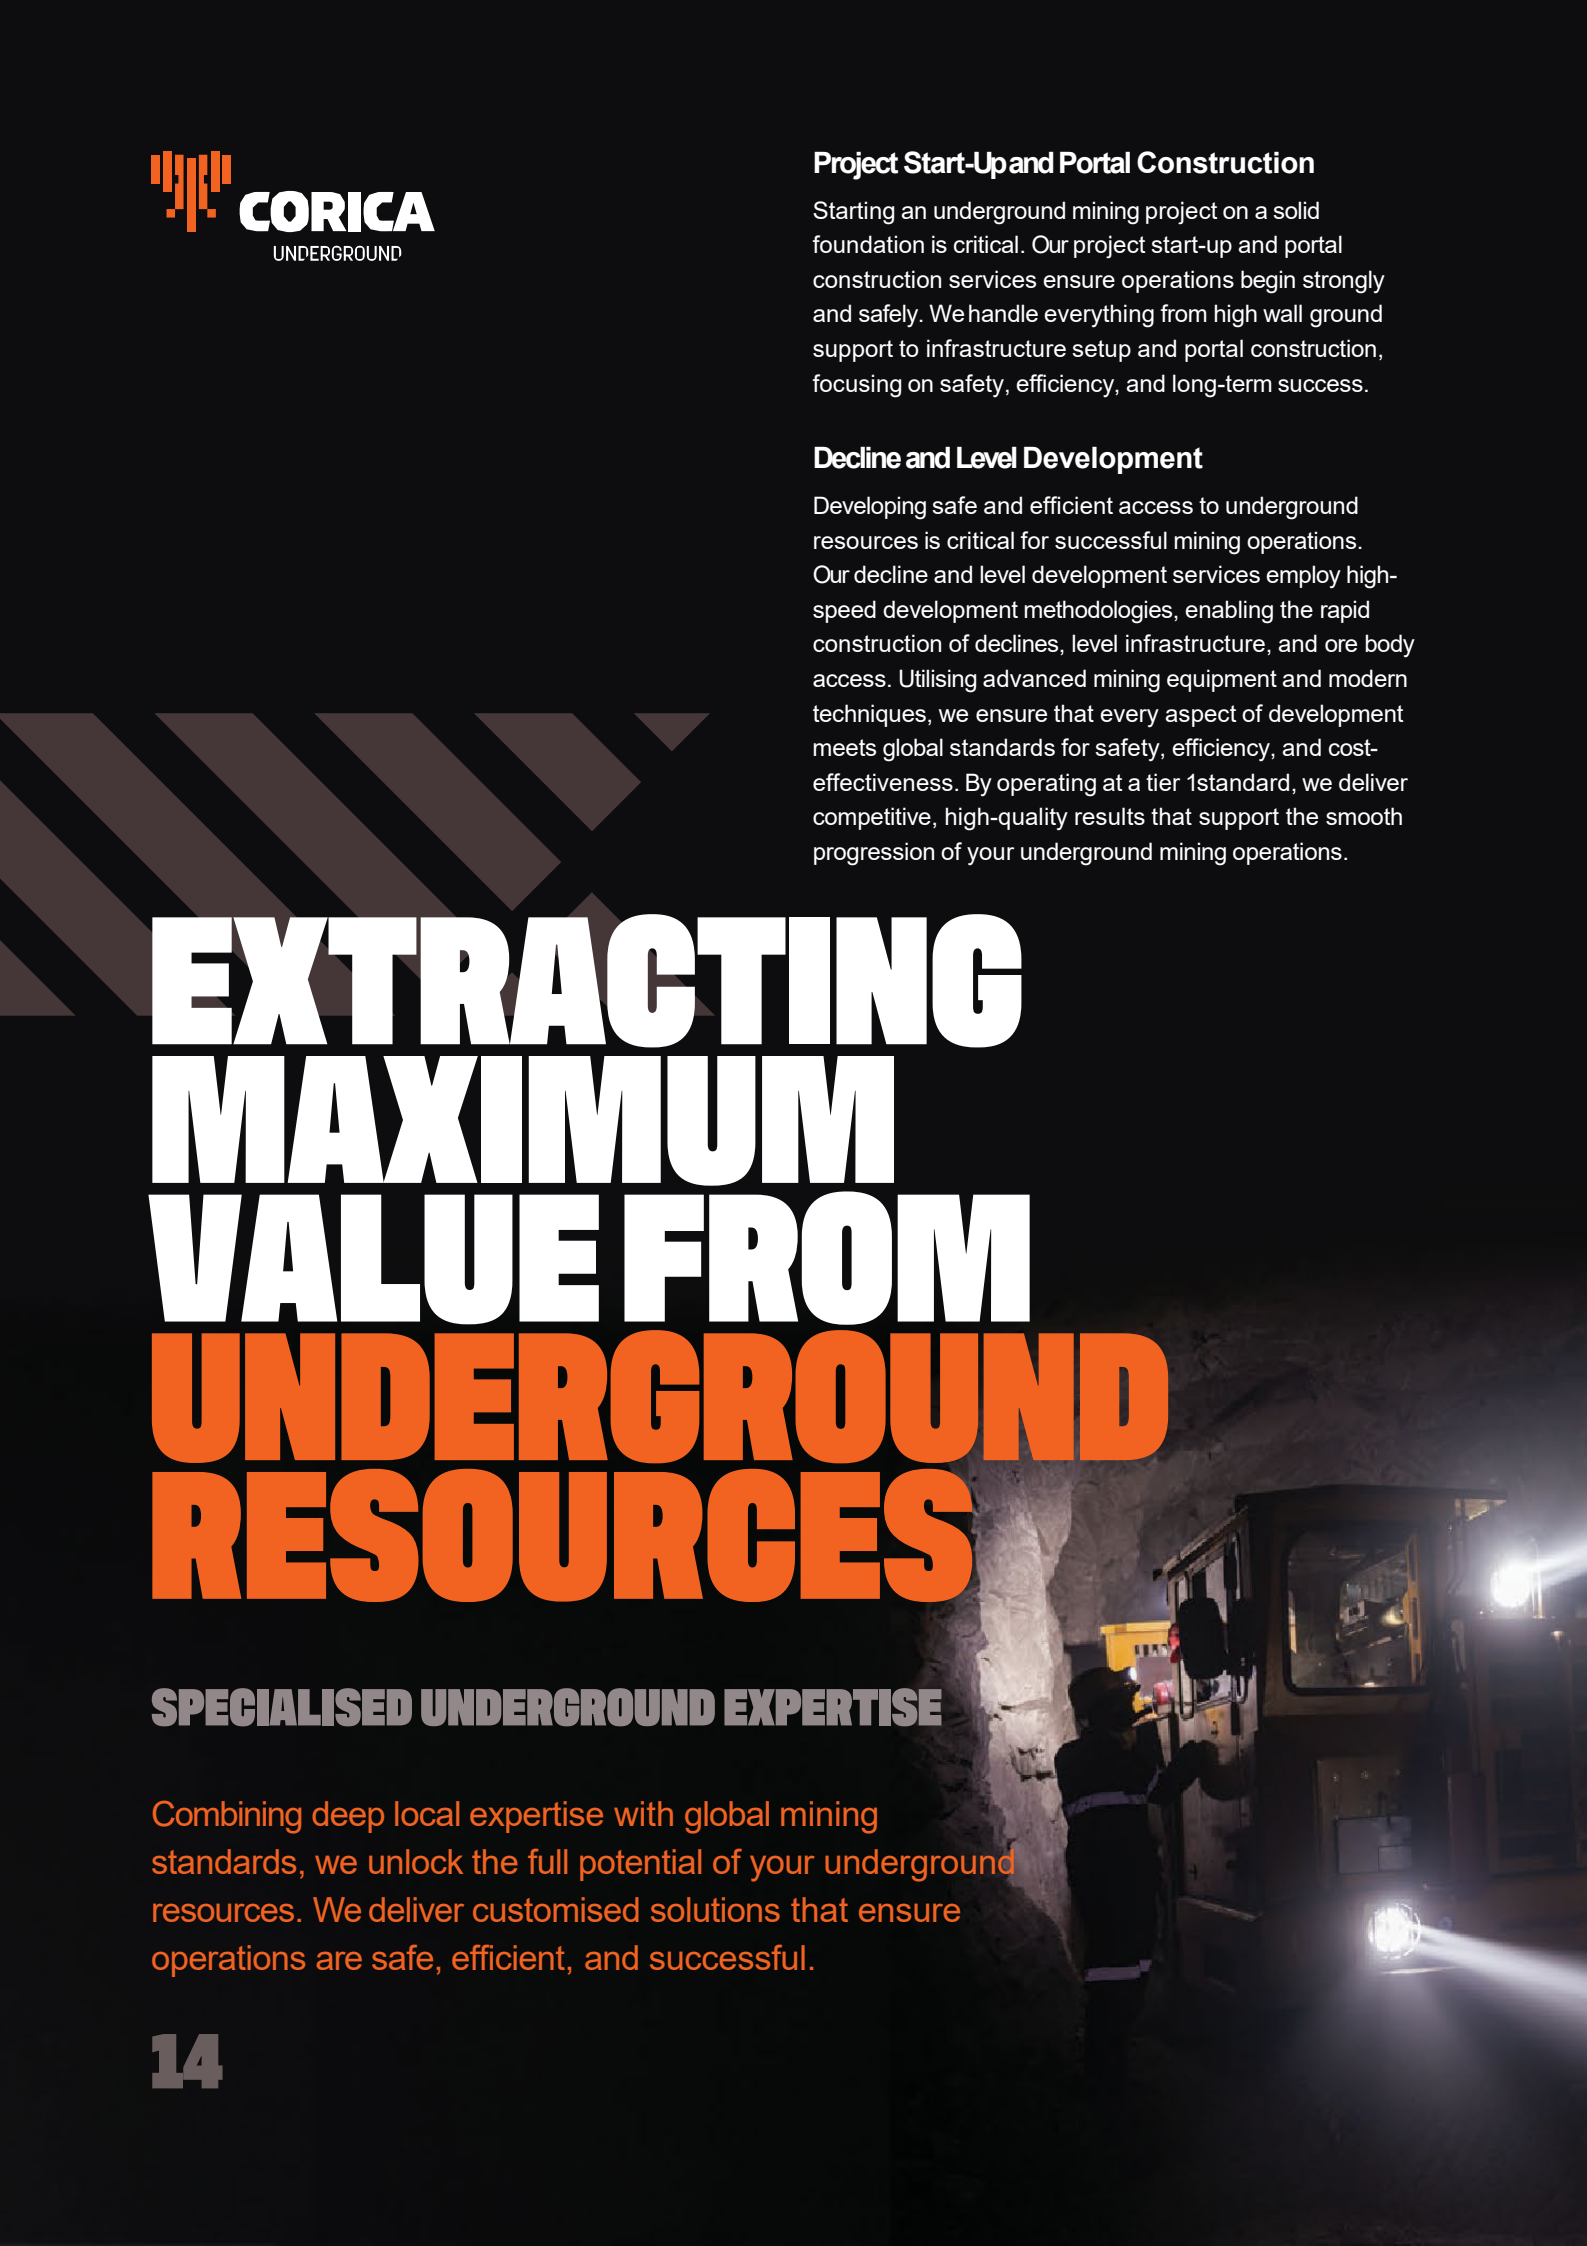

Project Start-Up and Portal Construction

Starting an underground mining project on a solid foundation is critical. Our project start-up and portal construction services ensure operations begin strongly and safely. We handle everything from high wall ground support to infrastructure setup and portal construction, focusing on safety, efficiency, and long-term success.

Decline and Level Development

Developing safe and efficient access to underground resources is critical for successful mining operations. Our decline and level development services employ high-speed development methodologies, enabling the rapid construction of declines, level infrastructure, and ore body access. Utilising advanced mining equipment and modern techniques, we ensure that every aspect of development meets global standards for safety, efficiency, and cost-effectiveness. By operating at a tier 1standard, we deliver competitive, high-quality results that support the smooth progression of your underground mining operations.

EXTRACTING MAXIMUM VALUE FROM UNDERGROUND RESOURCES

SPECIALISED UNDERGROUND EXPERTISE

Combining deep local expertise with global mining standards, we unlock the full potential of your underground resources. We deliver customised solutions that ensure operations are safe, efficient, and successful.

Production

Managing underground production effectively is central to our services. We oversee all aspects, from drilling and blasting to ore extraction and transport, with the goal of maximising resource recovery while minimising costs and environmental impact.

Diamond Drilling

Precision drilling is essential for high-quality core samples and accurate geological assessments. Our diamond drilling services are tailored to deliver reliable data, utilising state-of-the-art equipment to ensure each drill hole meets exacting standards.

Remnant Mining

Our remnant mining services are focused on extracting the maximum remaining value from existing mines. We approach each site with a deep understanding of its unique challenges and opportunities, utilising advanced techniques to safely and efficiently access and recover residual ore bodies. This process ensures that no resource is left untapped, providing significant value to our clients while adhering to the highest safety and environmental standards.

Rehabilitation

Our services include assisting clients in accessing old mines, installing new ground support, and modifying existing infrastructure to accommodate modern, often larger, mining machinery. We employ a holistic approach that integrates environmental stewardship with engineering expertise, ensuring that rehabilitated sites are safe, sustainable, and aligned with future land use plans.

Integrated Management

Embedding our expert staff within your team, our integrated management approach ensures every aspect of your operation meets global mining standards. From project management to technical services and operations, our professionals work closely with your team to achieve mine development and production goals. This hands-on partnership fosters immediate success and long-term operational excellence.

Our goal is to make your operation safer, more productive, and more efficient. With Corica as a trusted partner embedded within your team, you gain the advantage of both local expertise and global standards, delivering outcomes that exceed expectations.

Labour and Equipment Hire

Providing specialised personnel and equipment is essential for efficient mining operations. Our labour and equipment hire service offers experienced professionals and a modern fleet, tailored to meet your specific project needs, whether for short-term or long-term engagements.

Technical Support and Studies

Our technical support and studies services are designed to provide comprehensive assistance across all phases of mining projects. Whether you need short-term production, drilling, blasting or planning engineering support, or full-scale mining studies such as Preliminary Economic Assessments (PEA), Scoping Studies, or Feasibility Studies (FS), we have the expertise to deliver. Our capabilities extend across all technical areas, including geology, hydrology, geotechnical engineering, mine planning, drill and blast and production optimisation. We are committed to providing the insights and solutions necessary to help you achieve your project goals, from initial exploration through to full-scale production, and we can support you with all necessary technical expertise along the way.

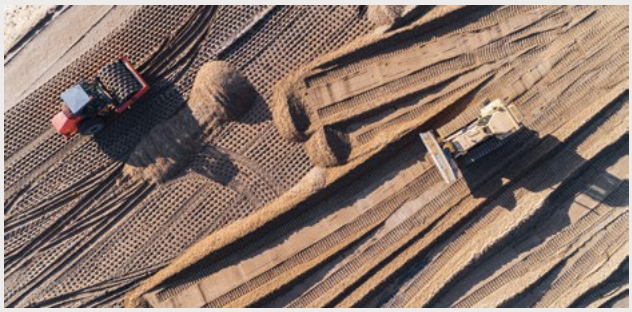

SFTP
CIVILS

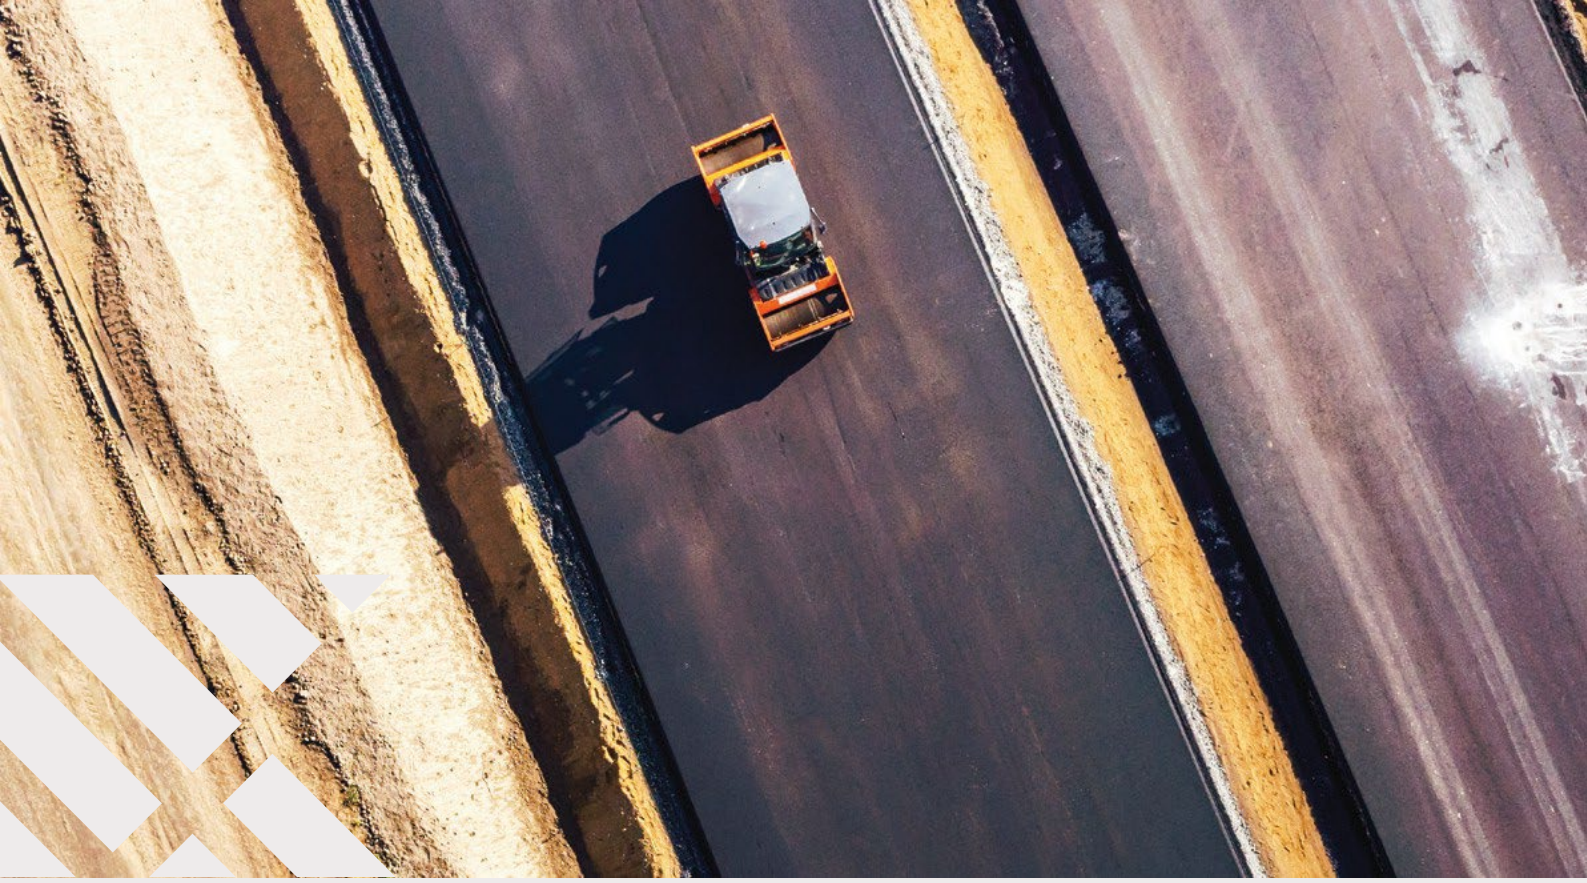

INFRASTRUCTURE DEVELOPMENT ACROSS AFRICA

CIVIL ENGINEERING AND CONSTRUCTION SERVICES

Civil engineering and construction services driving infrastructure development across Africa. We deliver robust, high-quality solutions tailored to meet the diverse needs of small- to large-scale projects, ensuring sustainable and enduring infrastructure.

Bulk Earthworks

Laying the foundation for large-scale mining and construction projects, our bulk earthworks services include everything from site clearance and excavation to precise grading. We bring decades of experience and a deep understanding of African terrains to deliver earthworks that meet the most stringent standards.

Site Preparation

Preparing your site is a critical first step in any project. Our site preparation services encompass land clearing, leveling, grading, and the installation of essential infrastructure such as drainage systems. We ensure your site is ready for development, providing a stable foundation that supports long-term success.

Road, Bridge, Rail and Dam Construction

Building infrastructure is key to successful mining operations. We specialise in constructing roads, bridges, rail systems, and dams that are built to last. Our engineering teams apply global standards, ensuring durability, safety, and efficiency across all projects.

Tailings Storage Facility (TSF) Construction

Effective management of mining waste is crucial for environmental stewardship and operational safety. Our Tailings Storage Facility (TSF) construction services are designed to align with the Global Industry Standard on Tailings Management (GISTM), ensuring that all structures meet the highest environmental and safety standards. We focus on efficiently raising TSF walls as rapidly as possible to provide sufficient storage capacity for plant tails, keeping pace with your mine's production plans. This approach ensures that your operation remains compliant, secure, and sustainable throughout the mining lifecycle.

Supply of Aggregate and Concrete

Supplying high-quality materials is fundamental to the success of any construction project. We provide a wide range of aggregates and concrete products tailored to your needs, whether for structural foundations, infrastructure projects, or road construction. Our reliable supply chain.

WHY CHOOSE CORICA

Expertise	With a proven track record and industry-leading expertise, we deliver exceptional results on every project.
Safety	We prioritise the safety of our workforce and the surrounding communities we work with, adhering to the highest safety standards in all our operations.
Sustainability	Our commitment to sustainable mining practices ensures minimal environmental impact and promotes long-term resource management.
Innovation	We leverage cutting-edge technology and innovative techniques to enhance efficiency and productivity in all our services.
